Marine Advisory/Warning None	Marine Advisory/Warning None	Marine Advisory/Warning None

Weather Discussion:

A light wind regime is likely to be in place within the next three days allowing for warm conditions across our islands. In addition, pockets of moisture embedded within the light winds increases the chance of afternoon showers.
Gentle (less than 20km/h) east south easterly to easterly trades are crossing our islands. Winds speed will be within the region of 15-25 km/h and the flow should remain generally south easterly from Monday with a shift to east north easterly expected on Tuesday. Seas are slight to moderate in open water with swell heights peaking near 1.0 m on western coasts and near 1.5 m on eastern coasts. Slight Saharan dust haze concentrations should be noticeable from today with a slight increase tonight into Thursday.
