Weather Discussion:

Instability trailing a tropical wave has triggered thunderstorms across our islands early Sunday. Although some additional occasional showers are anticipated, some improvement is expected during the night. A weak wave should affect the islands chain by Monday night triggering a few light showers. Slightly hazy conditions are expected on Tuesday with a few isolated showers early Wednesday.

Moderate to fresh (~15-30 km/h) south easterly to easterly trades are crossing our islands. A temporary slight decrease (~25 km/h) in speeds is expected on Monday. Seas are slight to moderate in open water with swells ranging between 0.5 m to 1.0 m on western coasts and between 1.2 m to 1.5 m on eastern coasts during this forecast period.
