Weather
Advisory/warning
None

Seas: moderate 1.5m to
2.3m / 5ft to 7.5ft

Marine
Advisory/Warning:
None

Weather Discussion:

There is a high chance that SVG will continue to experience pockets of showers and possible isolated thunderstorms over the next 3 days as the atmosphere remains unstable. The inter-tropical convergence zone (ITCZ) continues to affect the islands from last night into today, after which, a tropical wave will be in the vicinity. Model guidance is indicating a strong disturbance in the vicinity around Saturday. SVG Met will continue to monitor.

Thick haze should thin out on Friday, with another pocket- slight to moderate in intensity, expected over the weekend. Moderate east north east (ENE) trades (15km/h-30km/h) will move across the islands becoming breezy at times around Friday and Saturday. Seas should remain slight to moderate in open waters with swells ranging between 1.0m – 2.0m until Friday, when a deterioration is expected to take place (1.5m-2.5m).
