Weather Discussion:

A weak low-level trough continues to trigger light-moderate showers across St. Vincent and the Grenadines (SVG). Conditions are expected to be stable over the weekend, however daytime heating coupled with light winds could trigger isolated showers or thunderstorms across St. Vincent. Good visibility is expected across our area for the next few days.

Light-gentle (5 - 15km/h) breeze across SVG could occasionally increase to moderate breeze (20 - 24km/h) and directions vary between northeast and southeast in some locations.

Sea conditions are smooth-slight in open water, with swells near 0.5m(1.5ft) west of our islands and northerly swells east of our islands by Sunday, ranging 1.0m(3ft) to 1.2m(4ft).
