Marine Advisory/Warning: *None*	Marine Advisory/Warning: *None*	Marine Advisory/Warning: *None*

Weather Discussion:

Patches of Saharan dust are likely to create slight/moderate-haze across our area by tomorrow (Wednesday), occasionally reducing visibility and air quality. Meanwhile, tropical waves and unstable conditions could increase the chance for showers and thunderstorm activity across St. Vincent and the Grenadines (SVG) by late Thursday.

Gentle to moderate (15 - 25km/h) breeze across our islands could vary in direction between east north-easterly and east south-easterly in some locations.

Sea conditions are currently smooth to slight in open water, possibly nearing 0.5m(1.5ft) west of our islands and ranging 1.0m(3ft) to 1.5m(5ft) east of our islands by mid-week.
