Weather Discussion:

Mostly sunny condition will prevail across Saint Vincent and the Grenadines as Wednesday progresses, with clear skies at night. The atmosphere is forecast to be dry during the next few days across SVG, and model guidance indicates a mere 5mm of rainfall by Saturday night. The intensity of the Saharan dust haze has decreased, and by Friday should be totally out of the vicinity.

Gentle easterly trades (10km/h-20km/h) will move over the islands, backing to east north-east (ENE) on Saturday at 10km/h-25km. Seas are forecast to be slight to moderate in open waters with swells peaking at 1.0m on the western coasts and 1.5 on the eastern coasts.

Meteorological Forecaster: Desiree Neverson-Jack
