Cloudy with scattered showers, becoming mostly partly cloudy.

Weather
Advisory/warning
None

Seas: moderate 1.5m to 2.0m / 5ft to 7ft

Marine
Advisory/warning
None

Weather Discussion:

Showers are forecast for this evening into tonight, as instability lingers from a trough system. Residents and motorists in areas prone to flash-flooding and landslides or near rivers and streams are asked to exercise caution. There should be a decrease in cloud cover with scattered showers for the next few days, with model guidance indicating roughly 10mm/per day. Slightly higher amounts could take place across the Southern Grenadines.

East north easterly (ENE) winds can vary, ranging between 20km/h-40km/h allowing for breezy conditions at times, decreasing in speed ~ 15km/h-30km/h around Monday night/Tuesday. Seas will be moderate in open waters with swells ranging between 1.5m-2.0m on the western coasts and 2.0m- 2.5m on the eastern coasts. Small craft operators and sea-bathers should exercise caution for above-normal sea swells. No significant haze intrusion is forecast.
