## Weather Discussion:

Saharan dust haze concentrations will increase within the next few days reducing air quality and visibility across our islands...Be Alert! In addition, the Atlantic high pressure will remain dominant across the remainder of Tuesday. A weak approaching shearline will trigger pockets of showers from during the earlier parts of Wednesday. Relatively fair conditions are anticipated from late Wednesday into Friday.

Gentle to moderate (~15-25km/h) east south easterly trades will cross the islands during this forecast period becoming occasionally fresh (~30km/h) on Thursday. Sea conditions should remain slight to moderate in open waters during this forecast period with swells ranging between 0.8m to 1.2m on western coasts and between 1.8m to 2.0m on eastern coasts.
