Weather Discussion:

Expect fair conditions across Saint Vincent and the Grenadines on Friday, with mostly clear skies during the night. The atmosphere is forecast to be predominantly dry during the next few days across SVG, however, low-level moisture can become elevated at times resulting in scattered showers over the weekend into Monday.

Winds will blow from the east north east to east (ENE-E) at 20km/h to 35km/h, allowing for breezy conditions. Seas are forecast to be slight to moderate in open waters with swells peaking at 1.2m on the western coasts and 1.5m - 2.0m on the eastern coasts. Seas on the eastern coasts may become agitated at times due to increase wind speeds. No significant haze intrusion is forecast.
