Exercise Caution

Weather Discussion:

Low level moisture will gradually increase on Wednesday allowing for brief isolated showers. Thereafter, showers are forecast to increase in frequency and intensity by Thursday. Instability is forecast to last into Friday morning, and there is a medium chance of isolated thunderstorms during this time period. Mostly fair conditions are anticipated into Saturday.

Winds will blow from the east north east to east (ENE-E) at approximately 15km/h-35km/h allowing for occasional breezy conditions, with higher gust near showers. Seas will remain generally moderate, with swells ranging between 1.2m -1.5m on the western coasts and 1.5m-2.5m on the eastern coasts. Slight haze intrusion is forecast from Thursday.
