Weather Discussion:

Mostly sunny conditions during the day and clear skies during the night are forecast for most areas in Saint Vincent and the Grenadines as the Atlantic high pressure system dominates the weather pattern. Day time heating coupled with gentle winds can cause a few evening showers in isolated areas with the chance increasing on Tuesday.

Gentle to occasionally moderate winds will blow from the east north east to east (ENE-E) at approximately 15km/h to 30km/h. Seas will be slight to moderate in open waters with swells peaking at 1.0m on the western coasts and 2.0m on the eastern coasts. There will be no significant haze intrusion within this forecast period.
