Caution...Above normal
northerly swells

Saturday March 16th

Mostly fair & breezy

Weather Advisory/Warning: *None*

Seas: Slight to moderate 1.2m to 1.8m / 4ft to 6ft

Marine Advisory/Warning: *None*

Weather Discussion:

The Atlantic High Pressure System occasionally weakens and on its southern edge, low-level cloud patches trigger a few showers across St.Vincent and the Grenadines (SVG). No significant haze is expected before weekend, except for a thin film of dust which may be noticeable across our area at times.

Moderate-occasionally fresh (20 - 30km/h) breeze vary between east north-east and east south-east across our islands, increasing (30 - 38km/h) by Friday night.

Sea conditions are moderate in open water, with northerly swells ranging 1.2m - 1.5m west of our islands and ranging 1.5m - 2.0m east of our islands...*Small-craft operators and sea-bathers should exercise caution for above normal northerly sea-swells*...Slight-moderate (1.5m - 2.0m) sea conditions can be expected across SVG by Saturday.
