Marine advisory/warning None	Marine advisory/warning None	Marine advisory/warning None

Weather Discussion:

The upper level trough will linger across the island chain for the remainder of the day and on Thursday, allowing for the chance of a few light to moderate showers from time to time. A dry mid level environment will continue to limit shower activity. The Atlantic high pressure system will dominate at the lower levels, resulting in mostly fair conditions and brief sporadic showers into the weekend.

Moderate east north easterly trades at 15km/h to 30km/h are expected, backing to north east on occasion. Seas will be slight to moderate in open waters with northerly swells ranging between 1.0m-2.0m. No significant haze intrusion is forecasted within this period.
