

72 Hours Weather Outlook

Date: January 31st, 2024 (12noon)

**Thursday
February 1st**

Partly cloudy-cloudy,
moderate/thick-haze,
chance of a few showers

Weather
Advisory/Warning:
None

Seas: Slight to moderate
0.5m to 1.5m / 1.5ft to 5ft

Marine Advisory:
Caution...Moderate/thick-haze

**Friday
February 2nd**

Fair-partly cloudy,
slightly hazy, chance of
light showers

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.5m / 3ft to 5ft

Marine Advisory:
*Northerly swells-occasional
surf & rip currents*

**Saturday
February 3rd**

Partly cloudy, slightly
hazy, chance of isolated
showers

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.5m / 3ft to 5ft

Marine Advisory:
*Northerly swells-occasional
surf & rip currents*

Weather Discussion:

A plume of Saharan dust (varying concentration) crossing the islands has reduced visibility across St. Vincent and the Grenadines (SVG) in moderate/thick-haze. Saharan dust concentrations could thin-out during Thursday night, with slight-haze across SVG by Friday.

Gentle-moderate (15 - 25km/h) south-easterly winds across our islands could occasionally increase (~30km/h) on Thursday and decreasing (~10km/h) during Friday night and Saturday.

Marine conditions are slight to moderate in open water, with swells ranging 0.5 - 1.0m on western coasts and 1.0 - 1.5m on eastern coasts...*Small craft operators should exercise caution for reduced visibility (until Thursday night) in moderate/thick-haze across our area.*

Additionally, an area of low Pressure in the Atlantic Ocean is propagating long-period northerly swells which could reach along western coasts of our islands during Friday and spreading across the eastern coasts by Friday night...*Small-craft operators and sea-bathers should exercise extreme caution for occasional breaking wave action (surf) and rip currents.*
