Weather Discussion:

Apart from a few intermittent light to moderate showers, the next 3 days should remain relatively fair as SVG remains under the influence of the Atlantic High Pressure System. In addition, no significant haze intrusion is anticipated within this forecast period.

Moderate to fresh(20-30km/h) easterly to east north easterly trades are crossing the islands. Winds may shift to east south easterly from Wednesday. A slight increase(~35km/h) in speeds is forecast on Wednesday afternoon. Seas will be moderate in open waters with east north easterly swells ranging between 1.5m-2.5m. **Small craft operators and sea bathers should exercise caution for above normal sea swells.**
