Weather
Advisory/warning:
None

Seas: moderate 1.5m to
2.0 m / 5ft to 7ft

Marine advisory
Exercise caution

Weather Discussion:

A few cloudy periods are forecasted today across some areas of SVG. Isolated showers (north of mainland) are expected tonight. A ridge of high pressure will remain the dominant feature during the next few days pumping fresh breeze across the islands, with the likelihood of an upper level trough moving over the area around Friday night/ early Saturday morning, resulting in a few showers. Overall, mostly fair conditions are expected with a low chance of showers.

Fresh breeze 20km/h to 35km/h are expected. Winds will blow from the east, veering to east south east. Moderate sea conditions are expected with swells ranging between 1.5m-2.0m and small craft operators and sea bathers are asked to exercise caution. Slight haze intrusion is within this forecast period.
