Marine Advisory:
Exercise caution

Seas: Slight to moderate
1.2m to 1.8m /4ft to 6ft

Marine
Advisory/Warning:
None

Weather Discussion:

Unstable conditions would continue to generate cloudy skies and pockets of light to moderate showers into Friday. There is also a medium chance of thunderstorm activity. **Residents and motorists in areas prone to flooding and landslides or near rivers and streams should exercise caution.** Relatively fair conditions are expected from Saturday as The Atlantic high pressure system is expected to become the dominant weather pattern.

Fresh to strong (30-45km/h) north easterly trades are crossing the islands but will shift to east south easterly from Friday and should significantly decrease(15-25km/h) on Sunday. Seas are currently moderate in open water but could improve on Sunday. **Small craft operators and sea bathers should exercise caution for above normal sea swells and occasional gusty winds.** In addition, varying concentrations of Saharan dust haze will be visible throughout this forecast period reducing visibility and air quality.
