18th April 2021

LA SOUFRIÈRE BULLETIN #67 APRIL 18, 2021 10:00 AM

1. The swarm of long-period and hybrid earthquakes continued at La Soufrière with no significant change in their rate of occurrence. Occasional small volcano-tectonic earthquakes are still being recorded.
2. No episodes of tremor have been recorded since April 16.
3. The volcano continues to erupt although explosive activity appears to have ended at this time. Its current pattern of seismic activity may indicate growth of a lava dome, but this has not yet been confirmed.
4. Explosions with accompanying ashfall, of similar or larger magnitude, could restart in the future.
5. Alert level remains RED.
6. Eighty-eight shelters with 4042 occupants are now activated.
7. Some five thousand three hundred and ninety-eight persons (5398) are being housed in private shelter.
8. A total of 1,459 families have been displaced so far.
9. The National Emergency Operations Center continues to be fully functional operating on a twenty-four hour, around the clock basis.

10. NEMO will continue to provide regular updates on activities at the Volcano as they occur.
