**Monday
February 19th**

Fair to partly cloudy and breezy with moderate chance of isolated showers

Weather
Advisory/warning

None

Seas: moderate in open waters 1.5m to 2.5m / 5ft to 8ft

Exercise caution

Weather Discussion:

The atmosphere across Saint Vincent and the Grenadines (SVG) remains dry and relatively stable. The Atlantic high pressure system will be the dominant feature pumping fresh breeze across the island and allowing for a few occasional isolated showers. A gradual increase in wind speeds will result in a deterioration of seas, with northerly moderate swells. Small craft operators and sea bathers should exercise caution around Sunday and Monday.

Winds will blow from the east at 20km/h to 35km/h. Moderate seas are expected with easterly to northerly swells ranging between 1.5m to 2.0m on the western coasts in open waters, and 1.0m in sheltered areas, peaking at 2.5m on the eastern coasts. Slight haze intrusion is forecast across the islands during the next 3 days.
