

# 72 Hour Weather Outlook

**Date: February 18<sup>th</sup>, 2024 (12 noon)**

**Monday  
February 19<sup>th</sup>**

Fair-partly cloudy, breezy at times, isolated showers & slight-haze

Weather  
Advisory/Warning:  
*None*

Seas: Moderate  
1.5m to 2.0m / 5ft to 6.5ft

Marine Advisory:  
*Exercise caution...above  
normal swells*

**Tuesday  
February 20<sup>th</sup>**

Partly cloudy, isolated showers

Weather  
Advisory/Warning:  
*None*

Seas: Slight to moderate  
1.2m to 2.0m / 4ft to 6.5ft

Marine Advisory:  
*Exercise caution...above  
normal swells-falling*

**Wednesday  
February 21<sup>st</sup>**

Partly cloudy-cloudy, a few showers

Weather  
Advisory/Warning:  
*None*

Seas: Slight to moderate  
1.0m to 1.5m / 3ft to 5ft

Marine  
Advisory/Warning:  
*None*

## Weather Discussion:

Varying concentrations of Saharan dust continue across our area, creating an occasional film/slight-haze. On the south-western edge of the Atlantic High Pressure System, a few cloud patches interrupt fair conditions bringing isolated showers. A lower level trough is expected to cross the island chain by mid-week, bringing a few showers across St. Vincent and the Grenadines (SVG).

Moderate-fresh (20 - 35km/h) breeze vary in direction between east north-east and east south-east, becoming gentle-moderate (15 - 25km/h) by Wednesday.

Sea conditions are moderate in open water with swells near 1.5m on western coasts and near 2.0m on eastern coasts...*Small-craft operators and sea bathers should continue to exercise caution...* Swell heights are gradually falling and sea conditions across SVG are expected to be slight-moderate by Tuesday.
