1.5 m to 2.5m / 5ft to 8ft

Marine advisory  
Exercise caution

**Wednesday  
November 27<sup>th</sup>**

Mostly cloudy with scattered showers and isolated thunderstorms.

Weather advisory  
None

Seas: moderate 1.5 m  
to 2.5m / 5ft to 8ft

Marine advisory  
Exercise caution

## Weather Discussion:

Fluctuation in moisture levels will allow for occasional brief scattered showers for the remainder of Sunday, with possible increase in showers tonight. This weather pattern should continue up until Tuesday. The chance of isolated thunderstorms will be low during this period. Shower activity is forecast to increase around Wednesday with isolated thunderstorms due to an increase in low level moisture and favourable upper levels.

Winds are forecast from the east, backing to east north east (ENE) on occasions and veering to east south east (ESE) on occasions at (25km/h-35km/h) allowing for breezy conditions. Sea conditions will be moderate in open waters, with swells peaking at 1.5m on the western coasts and 2.5m on the eastern coasts. There will be no significant haze intrusion within the forecast period.
