Weather Discussion:

The atmosphere will remain relatively unstable across the region, therefore, fair conditions can be interrupted with a few scattered showers and isolated thunderstorms across Saint Vincent and the Grenadines during the next 3 days. A disturbance is visible in the eastern Atlantic but currently poses no threat to SVG as it tracks North West across the Central Atlantic over the next few days with a low chance of cyclone formation.

Light to moderate winds will blow from the south east to east (SE-E) at 10km/h-25km/h. Seas will be smooth to slight in open waters (0.5m-1.2m). There will be no significant haze intrusion.
