1.0m to 2.0m / 3ft to 7ft

**Marine  
Advisory/Warning:  
None**

**Thursday  
July 20<sup>th</sup>**

Scattered showers and haze

**Weather  
Advisory/warning:  
None**

Seas: slight to moderate  
1.0m to 2.0m/3ft to 7ft

**Marine  
Advisory/Warning:  
None**

## Weather Discussion:

The upcoming days are forecast to be hazy and breezy at times, with a high chance of showers as instability from a shear line affects the island chain, followed by a tropical wave. Model guidance is showing roughly 1-2 inches of rainfall accumulation, mainly over the Grenadines, by Wednesday night. Scattered showers are forecast for Thursday. There is a slight to moderate chance of isolated thunderstorm during this period and gusty winds can occur near showers.

Easterly (E) winds will gradually increase from Tuesday night (20km/h-35 km/h), veering to east south east (ESE) on Wednesday. Moderate (15km/h-30km/h) east north easterly trades are expected around Thursday. Seas will remain slight to moderate in open waters with swells ranging between 1.0m – 2.0m. Moderate haze intrusion around Wednesday and Thursday can degrade air quality.
