## Weather Discussion:

A tropical wave and its associated low continues to affect our islands. Showers, periods of light rain, isolated thunderstorms and gusty winds will persist along Tuesday. **Residents should exercise caution as a flash flood watch remains in effect.** Lingering instability could allow for additional showers along Wednesday while relatively fair conditions should return from Thursday as the day progresses. A few brief showers are likely during early Friday.

Moderate (15-30km/h) easterly trades should increase Wednesday (20-35 km/h), and become east south easterly (ESE). A gradual decrease is expected until they become gentle (~15km/h) on Friday. Seas are moderate in open waters with swells ranging between 1.5m – 2.5m. **Small craft operators and sea bathers should exercise caution.** Slight to moderate conditions (1.0m to 1.5m) should return by Thursday. There will be no significant haze intrusion within this forecast period.

**Meteorological Forecaster:** Gregory Cato
