July 8th**

Generally cloudy with high chance of showers and isolated thunderstorms.

Exercise caution

Seas: slight to moderate
1.0m to 2.0m/3ft to 7ft

Marine
Advisory/Warning:
None

Weather Discussion:

Patches of low level clouds will move across the island chain tonight and Thursday, resulting in the alternating of fair to cloudy conditions and brief sporadic showers as mid-levels remain dry across the island chain. The chance of showers increases during Thursday night with a very slight chance of isolated thunderstorms. Model guidance indicates a gradual increase in moisture as Friday progresses, with scattered moderate showers into Saturday and possible isolated thunderstorms as a tropical wave affects the islands.

Winds will blow generally from the east north east (ENE) at 20km/h-30 km/h, veering to east south east (ESE) from Friday evening. Seas will remain slight to moderate in open waters with swells ranging between 1.0m - 2.0m. Haze intrusion will continue to linger, and will thin out into the weekend.
