## Weather Discussion:

The Atlantic high pressure system will dominate the weather pattern across SVG allowing for relatively fair conditions up to early Friday. A few light intermittent showers are however likely. By late Friday a tropical wave will approach the islands and this could result in some scattered showers and possible isolated thunderstorms along Saturday especially across the southern islands. Trailing moisture could maintain occasional cloudy skies into Sunday.

Moderate to fresh (20 - 35km/h) breeze with directions east north-east to east and gusts near 40 km/h are anticipated across our islands within the next few days.

Marine conditions are moderate with swells ranging between 1.5m to 2.0m. Varying concentrations of Saharan dust haze will cross the islands within this forecast period.
