**Marine Advisory/Warning:
None**

Seas: slight to moderate
1.0 to 2.0m / 3.0 to 7.0ft

**Marine Advisory/Warning:
None**

Weather Discussion:

The Atlantic High Pressure System will dominate this forecast period. A mixture of fair conditions may be interrupted by the odd light shower within the first 48 hours. Models suggest the chance of showers increases around Wednesday night into early Thursday.

Easterly to east north easterly trade winds ranging between 10 to 30 km/h(gentle to fresh) are expected during the next 72 hours.

Consequently, slight to moderate east north easterly sea swells ranging between 1.0 to 2.0 meters or 3.0 to 7.0 feet are forecast during the next few days.

Varying concentrations of Saharan dust haze will continue to cross the islands during this forecast period reducing visibility and air quality.
