Exercise caution

**Tuesday
March 25th**

Occasionally cloudy, slightly hazy and breezy with some scattered showers.

Weather
Advisory/Warning
None

Seas: moderate
1.8 m to 2.5m / 6ft to 8ft

Marine Advisory
Exercise caution

Weather Discussion:

Breezy conditions and varying concentrations of Saharan dust haze should be noticeable across our islands within this forecast period. The Atlantic high pressure system is currently dominant, allowing for fair to partly cloudy skies with brief isolated showers. The chance of light to moderate showers increases around early Monday as weak unstable conditions cross our islands.

Gentle to moderate (20-35km/h) east south easterly trades are crossing our islands, increasing (~30-40km/h) and shifting to east north easterly by Sunday. Seas are moderate in open waters with swells peaking to 1.5m on the western coasts, and up to 2.0m on the eastern coasts. Swell heights could further increase as windspeeds agitate the ocean surface in the next few days. **Small craft operators and sea bathers should exercise caution for above normal sea swells.** Varying Saharan dust haze concentrations should be visible across this forecast period.
