

# 72 Hours Weather Outlook

**Date: May 25<sup>th</sup>, 2025 (12 Noon)**

**Monday  
May 26<sup>th</sup>**

Fair to partly cloudy, very hazy and breezy with isolated showers

**Weather Advisory:  
Saharan dust haze**

Seas: moderate  
1.8m to 2.5m/ 6ft to 8ft

**Marine Advisory  
Exercise caution**

**Tuesday  
May 27<sup>th</sup>**

Occasionally cloudy, hazy and breezy with scattered showers

**Weather Advisory:  
Saharan dust haze**

Seas: moderate  
1.5m to 2.5m/ 5ft to 8ft

**Marine Advisory  
Exercise caution**

**Wednesday  
May 28<sup>th</sup>**

Partly cloudy, hazy and breezy with a few scattered showers

**Weather  
Advisory/Warning:  
None**

Seas: moderate  
1.5m to 2.5m/ 5ft to 8ft

**Marine Advisory  
Exercise caution**

## Weather Discussion:

Saharan dust haze concentrations will thicken along Sunday evening, significantly reducing visibility and air quality across our islands. Meanwhile unstable conditions associated with a passing tropical wave will continue to trigger occasional light to moderate showers under breezy conditions for the remainder of today with improvement anticipated on Monday. A few passing showers are likely on the Mainland on Tuesday and this could spread to the Grenadines on Wednesday on occasions.

Strong (~40km/h) easterly to east north easterly trades are crossing our islands with gusts near showers. A slight decrease (~35km/h) in speed is expected from Tuesday. Consequently, seas will remain moderate in open water with swells ranging between 1.5 m to 2.5m. **Small craft operators and sea bathers should exercise extreme caution for above normal sea swells.**
