Exercise caution**

**Weather  
Advisory/warning:  
None**

Seas: moderate  
1.5m to 2.5 m / 5ft to 8ft

**Marine Advisory  
Exercise caution**

## Weather Discussion:

Fair to partly cloudy conditions are anticipated within the next 24 hours. A weak shearline should generate occasionally cloudy skies on Wednesday and increase the potential for a few isolated showers. On Thursday, the Atlantic high pressure system should once again become dominant.

Gentle to moderate (15-25km/h) easterly to east south easterly trades will cross the islands within the next 24 hours. A slight increase (~20-30km/h) is expected on Wednesday with a shift in direction to east north easterly. Speeds should further increase (~25-35km/h) on Thursday. Seas are slight to moderate in open water with swells peaking up to 1.0 m on western coasts and ranging between 1.5m to 2.0m on eastern coasts. Swell heights should begin to rise from Wednesday and sea conditions should become generally moderate. **Small craft operators and sea bathers should exercise caution.** In addition, no significant dust haze intrusion is anticipated during this forecast period.
