Weather Discussion:

The Atlantic High pressure system is dominating the weather pattern and a few sporadic light to moderate showers will cross the islands within the next 24 hours. Unstable conditions could trigger some pockets of moderate showers across our islands on Thursday and Friday.

Gentle to moderate (~15-25km/h) east north easterly trades are crossing our islands. Wind speeds should gradually decrease and become light by Thursday. Seas are slight to moderate in open water with swells peaking near 1.2m on western coasts and near 1.8m on eastern coasts. Swell heights could further decrease from Wednesday evening. In addition, varying Saharan dust haze concentrations are crossing our islands and should thin out on Thursday.
