

72 Hour Weather Outlook

Date: January 30th, 2025 (12 Noon)

**Friday
January 31st**

Fair to partly cloudy hazy and breezy with brief isolated showers

Weather Advisory
Dust haze intrusion

Seas: moderate
1.8 m to 2.5m / 6ft to 8ft

Marine Advisory
Exercise caution
Above normal sea swells

**Saturday
February 1st**

Partly cloudy to cloudy, hazy and breezy with a few isolated showers

Weather Advisory
Dust haze intrusion

Seas: moderate
1.5 m to 2.0m / 5ft to 7ft

Marine Advisory
Exercise caution
Above normal sea swells

**Sunday
February 2nd**

Cloudy slightly hazy and breezy with scattered showers

Weather
Advisory/Warning
None

Seas: moderate
1.5 m to 2.0m / 5ft to 7ft

Marine Advisory
Exercise caution
Above normal sea swells

Weather Discussion:

The Atlantic high pressure system is dominant across our islands, allowing for fair to occasionally cloudy skies under breezy conditions. Weak pulses could trigger some passing showers across the weekend but activity is expected to be short lived. Saharan dust haze concentrations should increase from Friday, further reducing visibility and air quality across our islands. A temporarily thinning out early may be noticeable early Sunday.

Moderate to fresh (~25-35 km/h) easterly to east north easterly trades are crossing our islands with temporary gusts. Seas are moderate in open waters ranging between at 1.5 and 1.8m on the western coasts and near 2.5m on the eastern coasts. **Small craft operators and sea-bathers should exercise extreme caution for above normal sea swells and occasional gusty winds.**
