Weather Discussion: A low chance of intermittent light showers is forecast during the next few days as the Atlantic High pressure system continues to dominate the weather pattern across the Eastern Caribbean. In addition, a mixture of fair and cloudy conditions accompanied by varying concentrations of Saharan dust haze will occasionally cross the islands. Moderate to fresh (20-30 km/h) easterly to east south-easterly trades are currently crossing the islands. Wind speeds will decrease (15-25 km/h) from Monday. Seas are slight to moderate in open water with swells peaking near 1.0m on western coasts and ranging between 1.8m to 2.0m on eastern coasts.
