

# 72 Hour Weather Outlook

**Date: May 29<sup>th</sup>, 2024 (12 Noon)**

**Thursday  
May 30<sup>th</sup>**

Cloudy; hazy & breezy with scattered showers; slight chance of thunderstorms.

**Weather Advisory:  
Remain alert  
Excess rainfall**

Seas: slight to moderate  
1.5 m to 2.0m / 5ft to 7ft

**Marine advisory  
Exercise caution**

**Friday  
May 31<sup>st</sup>**

Fair to partly cloudy; hazy & breezy with a slight chance of a few isolated showers.

**Weather Advisory  
None**

Seas: slight to moderate  
1.5 m to 2.0m / 5ft to 7ft

**Marine advisory  
Exercise caution**

**Saturday  
May 1<sup>st</sup>**

Fair to partly cloudy; hazy becoming cloudy with scattered showers.

**Weather  
Advisory/warning:  
None**

Seas: slight to moderate  
1.0 m to 2.0m / 3ft to 7ft

**Marine advisory  
Exercise caution**

## Weather Discussion:

Fair to occasionally cloudy skies with a few isolated showers are anticipated across SVG for the remainder of Wednesday. Models suggest a tropical wave will begin to affect the islands by late Wednesday night into Thursday. This wave should trigger moderate to heavy showers especially across the Southern Grenadines before spreading a few showers over the mainland. Improvements to these conditions are expected on Friday. On Saturday a weak tropical wave will affect the islands as the day progresses, however current model guidance suggests that no significant rainfall is expected from this feature.

Moderate to fresh (20-35km/h) easterly to east south easterly trades are crossing the islands and should decrease (~25km/h) on Saturday. Seas are moderate in open waters with swells ranging between 1.5m-2.0m. **Small craft operators and sea bathers should exercise caution for above normal sea swells.** Seas conditions should improve on Saturday. In addition, varying concentrations of Saharan dust will cross the islands within this forecast period, reducing air quality and visibility.
