Advisory/warning:
None

Seas: slight to moderate
1.0 m to 2.0m / 3ft to 7ft

Marine advisory
None

Weather Discussion:

Mostly fair and hazy conditions with the possibility of light showers are expected for the remainder of today, Friday. An increase in moisture is expected from tonight as a tropical wave and its associated instability inch closer to the island chain. Cloudy skies and scattered showers are forecast from time to time over the next few days. There is a slight chance of isolated thunderstorms. Saharan dust continues to reduce air quality and at times visibility and should clear on Sunday, to reappear on Monday.

Moderate to fresh (20-30km/h) easterly to east south easterly trades are forecast, with higher gust near showers. Seas are slight to moderate in open waters with swells ranging between 1.0m-2.0m.
