Weather Discussion:

A few light to moderate scattered showers are forecast to continue across Saint Vincent and the Grenadines during the course of the morning due to low-level unstable conditions. Mostly fair conditions are forecast for the latter part of the day into Friday. The chance of showers increases yet again as Saturday progresses, as moisture from the south moves over the island chain.

Winds will blow from the east south-east (ESE), backing to the east (E) on occasions at 15km/h to 30km/h today, increasing in strength as the day progresses into the weekend to roughly 35 km/h. Seas will be moderate in open waters with swells ranging between 1.5m to 2.0m. There will be slight haze intrusion within this forecast period.
