None

**Tuesday  
May 9<sup>th</sup>**

High chance of partly cloudy skies. Breezy at times.

Weather  
Advisory/warning:  
None

Seas: moderate 1.5m to  
2.0m / 5ft to 7ft

Marine  
Advisory/Warning:  
None

## Weather Discussion:

A few light isolated showers (10%-20% of the country) are forecast tonight as low level instability moves across the island chain from the south. Due to this instability, the chance of scattered showers (30%-60% of the country) increases on Sunday. Although most of the moisture will move away from the island chain by Monday, a few sporadic showers are expected. Mostly partly cloudy conditions should return around Tuesday.

Winds will blow from the east (E), veering to the east south-east (ESE) on occasions at 20 km/h to 30 km/h, seas will be slight to moderate in open waters with swells ranging between 1.2m to 1.8m. Winds will increase in strength around Monday night/Tuesday to roughly 25km/h - 35 km/h and seas will become generally moderate from Monday night with swells ranging between 1.5m on the western coasts and 2.0m on the eastern coasts. Slight haze intrusion will continue during this forecast period.
