## Weather Discussion:

Unstable conditions will continue to trigger pockets of light to moderate showers and isolated thunderstorms across our islands into late Sunday. As Monday progresses, fair to partly cloudy skies and a few passing showers are anticipated. The chance of showers and thunderstorm activity increases along Tuesday as a tropical wave is expected to affect the islands. Lingering instability is expected to generate showers into early Wednesday.

**Residents and motorists should remain alert.**

Moderate to fresh (20-30km/h) east south easterly to easterly trades are crossing our islands. Wind speeds should slightly increase (~25-35km/h) on Monday. Sea are slight to moderate in open water with swells peaking up to 1.0m on western coasts and near 2.2m on eastern coasts and rising. **Small craft operators and sea bathers should continue to exercise caution.** Sea conditions could improve by late Wednesday. Varying Saharan dust haze concentrations are crossing the islands but should begin to thin out along Tuesday.
