October 26th**

Fair to occasionally cloudy with isolated showers

Weather
Advisory/Warning
None

Seas: slight to moderate
1.2 m to 1.8m / 4ft to 6ft

Marine
Advisory/Warning
None

Weather Discussion:

A ridge pattern is dominant across our islands allowing for relatively fair conditions for the remainder of Wednesday. A few passing showers are likely during nightfall. A tropical wave approaches our islands and as Thursday progresses, the chance of showers increases as well as the potential for thunderstorms. **Residents and motorists should remain alert.** Apart from a few early morning showers, Friday is forecast to be hazy, whereas on Saturday, occasional light to moderate showers are anticipated as weak pulses cross our islands.

Moderate to fresh (20-30km/h) east south easterly to easterly trades are crossing our islands becoming east north easterly and strong (~40km/h) by late Thursday. Wind speeds should slightly decrease (~20-30km/h) on Saturday. Seas are slight to moderate in open water with swells peaking up to 1.0m on western coasts and near 1.8m on eastern coasts. Seas will deteriorate by late Thursday. **Small craft operators and sea bathers should exercise caution for above normal sea swells.** Sea conditions could improve by Saturday. Saharan dust haze concentrations should gradually increase across our islands from late Thursday, reducing air quality and visibility.
