Weather Discussion:

A light wind regime will facilitate warm conditions across SVG within the next three days. This increases the potential for localised afternoon showers. Light to moderate sporadic shower activity may also interrupt these warm periods. A few morning showers are likely on Sunday, however as the day progresses generally fair and warm conditions will persist.

Light and gentle (<20km/h) east north easterly to east south easterly trades will cross the islands during this forecast period. Sea conditions are smooth to slight on eastern coasts ranging from 0.5m to 1.0m and moderate on eastern coasts peaking near 1.5m. No significant Saharan dust haze concentrations are expected during this forecast period.
