Advisory/Warning:  
None

**Friday  
June 2<sup>nd</sup>**

Chance of similar conditions to the previous day mixed with haze.

Weather  
Advisory/warning:  
None

Seas: slight to moderate  
1.0m to 1.5m / 3ft to 5ft

Marine  
Advisory/Warning:  
None

## Weather Discussion:

Tonight, expect a few scattered moderate showers. The atmosphere is unstable due to the presence of a few tropical waves in the Atlantic. Most of the shower activity of these waves are located over Trinidad and southwards. As Wednesday progresses, Saint Vincent and the Grenadines can expect an increase in cloud cover as one of the waves draws closer to the island chain. Although upper levels are not conducive for development, scattered light to moderate showers are forecast around Thursday and Friday.

A general east south easterly wind flow (ESE at 15km/h-30km/h) is forecast. Gusty winds are likely near showers around Thursday night. Seas will be slight to moderate in open waters with swells ranging between 1.0m-1.5m. Slight haze intrusion is likely around Thursday gradually increasing on Friday.
