Weather  
Advisory/Warning:  
*None*

Seas: Slight to moderate  
1.2m to 2.0m / 4ft to 6.5ft

Marine Advisory:  
*Above normal swells*

## Weather Discussion:

The Atlantic High Pressure System is the dominant feature and on its southern edge, shallow cloud patches are bringing a few/isolated showers across St. Vincent and the Grenadines (SVG). Saharan dust concentrations could create a film/slight-haze across our area at times.

Moderate-occasionally fresh (20 - 30km/h) breeze continues across our islands, with wind directions ranging from northeast to east northeast in some locations. Wind speeds could occasionally increase near 35km/h, especially during nights and mornings.

Sea conditions are slight to moderate in open water, with swells ranging 1.2m to 1.5m west of our islands and 1.8m to 2.5m east of our islands...*Small-craft operators and sea-bathers should exercise caution for above normal swells...*A temporary fall in swell heights may be noticeable by late Tuesday, nearing 1.2m west of our islands and 2.0m east of our islands.
