Weather
Advisory/Warning:
None

Seas: Moderate in open water
1.5m to 2.5m / 5ft to 8ft

Marine Advisory:
*Above normal swells
& gusty winds*

Weather Discussion:

A lower-level trough is crossing the islands and weak unstable conditions could maintain occasional cloudy skies with a few showers across St. Vincent and the Grenadines (SVG) later today (Thursday). Towards the weekend, increasing cloud-cover and scattered showers can be expected across SVG as lower-level troughs cross the islands. A film of haze may be noticeable at times, due to slight concentrations of Saharan dust.

Moderate (~25km/h) northeasterly breeze across our islands are expected to gradually increase, with wind directions ranging from northeast to east southeasterly in some locations. Fresh-occasionally strong (35 - 40km/h) breeze can be expected during Saturday and Sunday.

Sea conditions are slight to moderate in open water, with occasional northerly swells near 1.0m west of our islands and ranging 1.2m - 1.8m east of our islands. Swell heights could start rising during Saturday...*Small-craft operators and sea-bathers should exercise caution for above normal swells (~1.5m west of our islands and ~2.5m east of our islands) and gusty winds starting from Saturday night and continuing on Sunday.*
