few scattered showers,
isolated thunderstorms
& slight/moderate-haze

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.5m / 3ft to 5ft

Marine
Advisory/Warning:
None

Weather Discussion:

Weak unstable conditions are maintaining occasional clouds, a few showers and isolated thunderstorms across St. Vincent and the Grenadines (SVG). Patches of Saharan dust continue to limit shower activity and create slight/moderate-haze across our area.

Moderate-fresh (20 - 35km/h) breeze across our islands, could range between northeast and east in some locations.

Sea conditions are slight to moderate in open water, with swells near 1.0m(3ft) west of our islands and 1.5m(5ft) east of our islands. Swell heights could temporarily rise near 1.8m(6ft) east of our islands during Wednesday.

Across the Tropical Atlantic Ocean, a tropical wave with disorganized showers and thunderstorms has a low chance (20 %) for development during the next few days...The St. Vincent and the Grenadines Meteorological Services (SVG MET Services) will continue to monitor the Tropical Atlantic Ocean and issue updates/advisories as necessary.
