Weather Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.5m / 3ft to 5ft

Marine Advisory/Warning:
None

Weather Discussion:

Cloudy skies and scattered showers across St. Vincent and the Grenadines (SVG) continue this evening into early Monday, with light-moderate showers and thunderstorm activity...*Residents and motorists in areas prone to flooding and landslides or near rivers and streams should be alert.* A temporary reduction in shower/thunderstorm activity is likely during Monday, followed by a wind-surge (overnight) bringing showers and thunderstorms across SVG during Tuesday. A few showers are likely on Wednesday. Varying concentrations of Saharan dust create haziness across our area and thicken with poor visibility at times...*Be Alert!*

Light-gentle (< 15km/h) winds across our islands are expected to gradually increase, varying in direction between east north-east and south-east in some locations. Wind speeds peak Monday night/early Tuesday with strong/high winds (40 - 50km/h) possible across SVG...*Be Alert!*

Sea conditions are slight to moderate in open water, ranging 1.0 - 1.5m west of our islands and 1.5 - 2.0m east of our islands, peaking (2.0 - 2.5m) by early Tuesday...*Small craft operators and sea bathers should exercise caution for poor visibility, above normal seas and strong winds.*
