Advisory/Warning:
None

**Saturday
June 8th**

Partly cloudy-cloudy, breezy at times, a few showers & slight-haze

Weather
Advisory/Warning:
None

Seas: Slight to moderate
1.0m to 1.8m / 3ft to 6ft

Marine
Advisory/Warning:
None

Weather Discussion:

Moisture levels and shower activity have decreased across St. Vincent and the Grenadines (SVG) and stable conditions are expected, as the Atlantic High Pressure System becomes dominant. Fair-partly cloudy skies and brief isolated showers are likely across SVG, gradually increasing towards weekend. Meanwhile, varying concentrations of Saharan dust is creating moderate-haze across our area today and thinning-out to slight-haze by Friday.

Moderate-occasionally fresh (20 - 30km/h) east south-easterly wind-flow across our islands could gust near 35km/h at times. Wind directions are likely to vary between east north-east and east in some locations.

Sea conditions are slight to moderate in open water, with swells ranging 0.5m - 1.0m west of our islands and 1.0m - 2.0m east of our islands...*Small-craft operators should exercise caution due to reduced visibility (poor) in moderate dust-haze this (Wednesday) afternoon.*
