May 5th**

Occasionally cloudy,
a few showers
& moderate-haze

Weather
Advisory/Warning:
None

Seas: Slight in open water
0.5m to 1.2m / 1.5ft to 4ft

Marine Advisory:
*Poor visibility...moderate
dust-haze*

Weather Discussion:

Weak unstable conditions are approaching the islands, bringing occasional cloudy skies with a few scattered showers across St. Vincent and the Grenadines(SVG) by this(Friday) evening. Saharan dust concentrations continue to create slight haze across our area today. Concentrations are likely to thicken with moderate/thick-haze limiting shower activity and creating poor visibility across our area by Saturday afternoon...Be aware.

Light-gentle (5 - 15km/h) breeze across our islands could occasionally increase to a moderate breeze (20 - 25km/h) and wind directions are expected to vary from east northeast to southeast in some locations.

Sea conditions are currently slight to moderate in open water, with swells near 0.5m west of our islands and up to 1.5m east of our islands. Over the weekend, slight sea conditions are expected across SVG, with swell heights ranging 0.5m to 1.2m. Meanwhile, *small-craft operators should exercise caution as visibility could become poor(reduced) due to moderate/thick dust-haze by Saturday afternoon.*
