1.0m to 1.8m / 3ft to 6ft

Marine Advisory:  
*Above normal northerly swells  
& occasional rip currents*

Marine Advisory:  
*Above normal northerly swells  
& occasional rip currents*

Marine  
Advisory/Warning:  
*None*

## Weather Discussion:

A few scattered showers and isolated thunderstorms are likely across St. Vincent and the Grenadines(SVG) this evening. Clouds/moisture converging on the southern edge of the western Atlantic High Pressure System could support moderate showers and thunderstorms across SVG by late Monday...*Residents and motorists in areas prone to flash-flooding and landslides or near rivers and streams should be alert and exercise caution on Tuesday.*

Light-gentle (< 20km/h) breeze are crossing our islands, occasionally increasing to moderate (~ 25km/h) and wind directions vary widely.

Sea conditions are slight to moderate in open water, with swells ranging 0.5m -1.0m west of our islands and up to 2.0m east of our islands. Occasional northerly swells could create rip currents along our shores...*Small-craft operators and sea-bathers should exercise caution.*

*The St. Vincent and the Grenadines Meteorological Services will continue to monitor developments across the Caribbean Sea and Tropical Atlantic Ocean, issuing updates/advisories as necessary.*
