few scattered showers,
isolated thunderstorms
& slight-haze

Weather Advisory:
Be Alert

Seas: Slight to moderate
1.0m to 1.5m / 3ft to 5ft

**Marine
Advisory/Warning:**
None

Weather Discussion:

A tropical wave is crossing the islands; bringing periods of rain, moderate-heavy showers and thunderstorm activity across St. Vincent and the Grenadines (SVG) this evening/tonight. Over the next few days, unstable conditions associated with troughs/tropical waves could support showers and isolated thunderstorms across our islands... *Residents and motorists in areas prone to flash-flooding and landslides or near rivers and streams should exercise caution and be alert.* Saharan dust concentrations could create a film/slight-haze across our area during Monday.

Gentle-moderate (15 - 25km/h) breeze across our islands could occasionally increase near 30km/h and wind directions vary between north-east and east south-east in some locations.

Sea conditions are slight to moderate in open water, with swells ranging 1.0m to 1.2m west of our islands and ranging 1.5m to 2.5m east of our islands. Swell heights are expected to gradually fall during the weekend, ranging 1.0m - 1.5m across SVG by Monday.

The St. Vincent and the Grenadines Meteorological Services will continue to monitor developments across the Caribbean Sea and Tropical Atlantic Ocean, issuing updates/advisories as necessary.
