**Weather  
Advisory/Warning:**  
*None*

Seas: Smooth to slight  
Less than 1.2m / 4ft

**Marine  
Advisory/Warning:**  
*None*

## Weather Discussion:

Unstable conditions are crossing the islands, with low-level clouds converging across St. Vincent and the Grenadines (SVG). Light-moderate showers with thunderstorm activity across SVG are likely to continue, with possible flash-flooding...*Residents and motorists in areas prone to flash-flooding and landslides or near rivers and streams should exercise caution...*Fairly good visibility continues across our area, with an occasional film of haze.

Light-moderate (10 - 20km/h) breeze across our islands could vary from east north-easterly to south-easterly in some locations, occasionally increasing (~ 25km/h) near showers.

Sea conditions are slight to moderate in open water, with swells near 0.5m west of our islands and ranging 0.8m - 1.5m east of our islands.

Tropical Storm Gordon is expected to remain over the Atlantic Ocean, with no coastal watches or warnings in effect...*The St. Vincent and the Grenadines Meteorological Services will continue to monitor any developments and issue updates/advisories as necessary.*
